

In the Claims

Please amend claim 19 as follows to correct the paragraph numbering. No other claim amendments are being filed.

1. (Original) A method of providing a web page to a member of a call, comprising the steps of:-
 - (i) accessing a plurality of web pages; each of the web pages being associated with pre-specified information about potential calls;
 - (ii) selecting one of the web pages using information about the call and providing the selected web page to the call member.
2. (Original) A method as claimed in claim 1 wherein the web pages are provided on behalf of a second call member to a call member.
3. (Original) A method as claimed in claim 1 wherein said step of accessing a plurality of web pages occurs on initiation or receipt of a call by the call member.
4. (Original) A method as claimed in claim 1 wherein said step of providing access to a plurality of web pages comprises accessing a pre-defined web server on which the web pages are stored.
5. (Original) A method as claimed in claim 4 wherein the pre-defined web server is accessed by setting up a data call from the first call member to the web server.
6. (Original) A method as claimed in claim 2 wherein each of the call members comprises a terminal connected to a communications network over which the call is established.
7. (Original) A method as claimed in claim 6 wherein each of said terminals comprise a web-browser suitable for displaying a web page on the terminal.
8. (Original) A method as claimed in claim 6 wherein web pages are stored on each of the terminals.

9. (Original) A method as claimed in claim 2 which further comprises storing a second plurality of web pages which are to be provided on behalf of the first call member.
10. (Original) A method as claimed in claim 1 wherein said pre-specified information about potential calls comprises information about one or more potential call members.
11. (Original) A method as claimed in claim 10 wherein said information about one or more potential call members comprises directory numbers.
12. (Original) A method as claimed in claim 1 wherein said pre-specified information about potential calls comprises time of day information.
13. (Original) An apparatus for providing a web page to a member of a call, comprising:-
 - (i) an input arranged to access a plurality of web pages; each of the web pages being associated with pre-specified information about potential calls;
 - (ii) a processor arranged to select one of the web pages using information about the call and to provide the selected web page to the call member.
14. (Original) An apparatus as claimed in claim 13 which is a web server.
15. (Original) An apparatus as claimed in claim 13 wherein said input arranged to access a plurality of web pages is arranged to send java servlets to one or more backend databases where the web pages are stored.
16. (Original) A communications network comprising an apparatus as claimed in claim 13.
17. (Original) A computer program arranged to control an apparatus in order to provide a web page to a member of a call, said computer program being arranged to control the apparatus such that:

- (i) a plurality of web pages are accessed; each of the web pages being associated with information about potential calls; and
 - (ii) one of the web pages is selected using information about the call and the selected web page is provided to the call member.
18. (Original) A computer program as claimed in claim 17 which is stored on a computer readable medium.
19. (Currently amended) A method of displaying a web page at a telephone terminal, said telephone terminal comprising a web browser arranged to display web pages on the terminal, said method comprising the steps of:-
- (i) on initiation or receipt of a telephone call by the telephone terminal, establishing communication with a source that has access to a plurality of web pages, each of the web pages being associated with information about potential calls;
 - [(i)](ii) receiving a web page from the source, said web page having been selected using information about the call; and
 - [(ii)](iii) displaying the selected web page on the mobile telephone terminal.
20. (Original) A method as claimed in claim 19 wherein communication is established with the source by sending a command to a pre-defined web server address.
21. (Original) A method as claimed in claim 19 which further comprises sending information about the telephone terminal to the source.
22. (Original) A telephone terminal comprising:
- (i) a plurality of web pages, each web page being associated with information about potential calls with the telephone terminal; and

(ii) a web browser arranged to display web pages on the telephone terminal.

23. (Original) A web site comprising a plurality of web pages, each web page being associated with information about potential calls.
